GOOGLE DATA ANALYTICS CAPSTONE PROJECT

Telco Customer Churn & Revenue Protection Strategy

Identifying high-risk customer segments and revenue loss drivers to optimize retention strategies.

Prepared for Executive Leadership

EXECUTIVE OVERVIEW

Baseline Metrics & Financial Impact

7,043

Total Accounts

Total active customer base analyzed

26.54%

Overall Churn Rate

1,869 accounts lost from total base

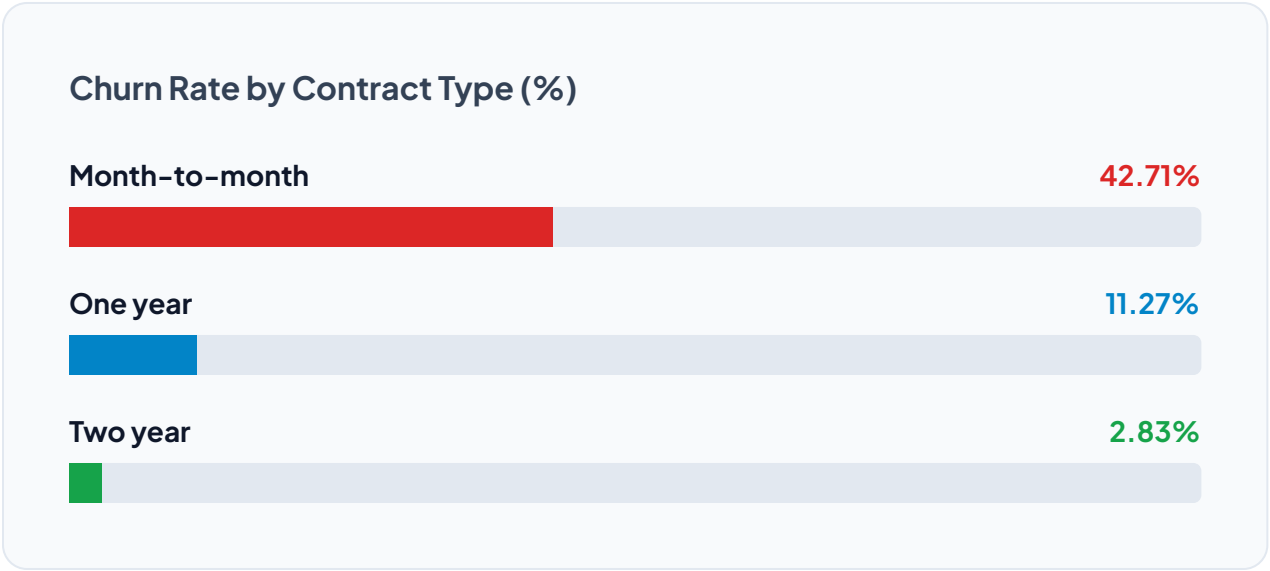
$139.1K

Monthly Revenue Lost

$139,130.85 lost in recurring revenue

KEY FINDING #1

Contract Type Risk Analysis



Primary Churn Driver

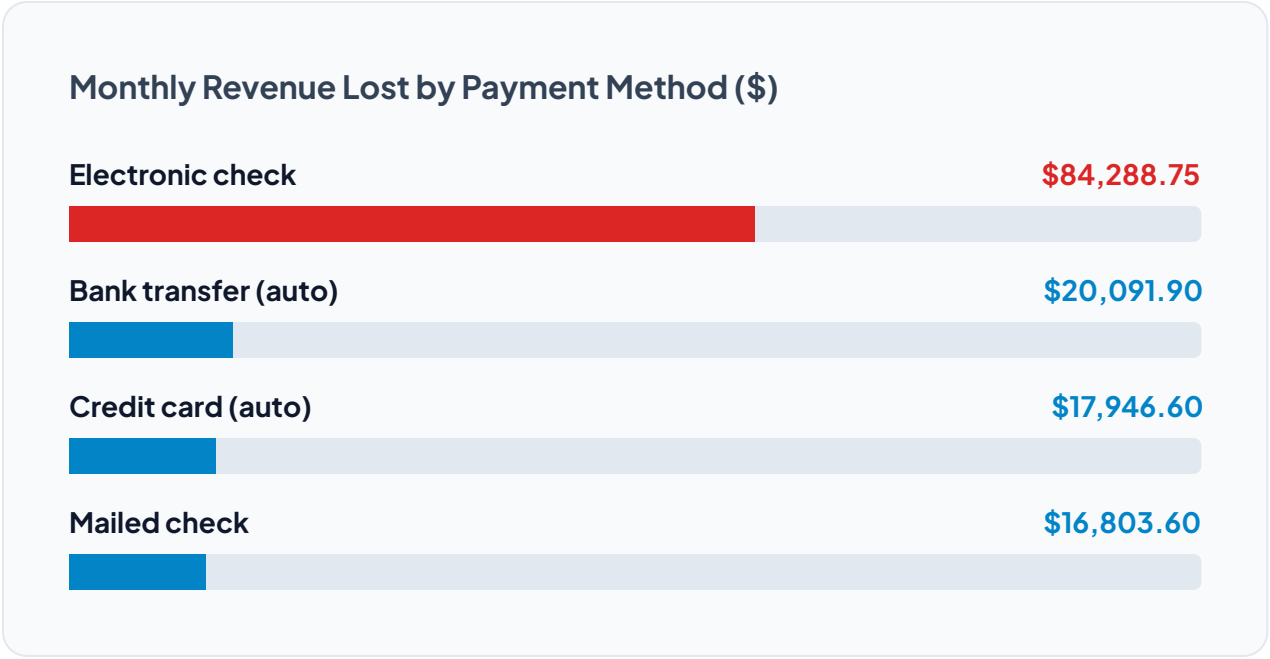
Month-to-month contracts exhibit a **42.71% churn rate**, compared to just **2.83%** for two-year contracts.

Volume Impact

Short-term contract holders represent **88.5% of total lost customer volume** (1,655 out of 1,869 churns).

KEY FINDING #2

Payment Channel Friction



Revenue Concentration

Electronic Check users account for **$84.2K (60.5%)** of all lost monthly recurring revenue.

Autopay Protection

Automated payment channels (Bank Transfer and Credit Card) maintain significantly lower churn profiles.

ACTION PLAN

Strategic Recommendations

1. Contract Upgrades

Introduce a 15% promotional discount for the first 3 months to incentivize Month-to-Month users to switch to 1–year commitments during onboarding.

2. Autopay Migration

Provide a $5 monthly bill credit for customers migrating from Electronic Check to automated bank transfer or credit card payments.
